

Unparalleled Connectivity: Unlock the Success of Streaming Media

Most Connected Data Centres Campus for Streaming Media

Streaming media continues to grow rapidly, spanning across different applications, from entertainment, sports, gaming to social media, on any internet-connected screen.

For OTT players and content providers who want to offer streaming services to viewers and expand across markets, seamless viewing experience with ultra-low latency and connectivity redundancy are always their top priorities.

SUNeVision offers a one-stop solution for global OTT providers as well as those from Asia and mainland China to grab a slice of the pie in this competitive market through a wide range of connectivity solutions and a highly connected data centre ecosystem. With SUNeVision, OTT players and content providers are able to enjoy:

Lower Cost, Enhanced Performance

Directly connect to ISPs in Hong Kong via the two HKIX satellite sites on MEGA Campus where intra-Hong Kong traffic can be exchanged locally without any overseas routing. MEGA Campus is the only data centres campus in Hong Kong which houses two HKIX satellite sites, providing the best viewing experience possible for local users with the shortest distance and reduced cost. Customers can also exchange traffic via various internet exchange services including AMS-IX, BBIX and KINX.

Flexibly Extend Reach in Asia

Establish one-to-many private peering with a wide array of local ISPs and telcos in Asia resided in our Asia leading connectivity hub via cross-connects. You can also efficiently test dynamic traffic and expand into new markets via **Regional Transit Exchange**, reaching users, business partners and service providers in Asia easily without geographic boundaries.

Strategic Gateway to Mainland China

Take advantage of the strategic locations and connectivity our data centres campus in Hong Kong, multinational companies are able to step into China by creating private connections to local, Chinese and regional telcos housed in our highly connected data centres. Likewise, Chinese enterprises can also expand overseas through our facilities.

Full Agility & Greater Resilience

Flexibly choose your desired ISPs, telcos and service providers from the strong marketplace on MEGA Campus to quickly respond to market needs with cost-effective and efficient solutions. You can create diversified connections by deploying in any data centres on MEGA Campus for full back-up, recovery and business continuity. You can also directly connect to multi-cloud players for any ad hoc requests which create a dynamic surge in internet traffic.

About MEGA Campus

SUNeVision forms MEGA Campus by extending the connectivity edge from highly connected MEGA-i to other high-tier data centres, including MEGA Two and MEGA Plus.

Facilities on MEGA Campus are interconnected through high-performance dedicated fibres and more than 14,000 cross-connects.

Together with City PoPs of major submarine cables in our facilities, we enable our customers for direct connections to multi-cloud platforms and multi-cloud exchanges with the best connectivity in town. We are committed to supporting Hong Kong as a regional information hub and a strategic gateway to mainland China.
